# Declaration

I certify that

- The work contained in this report is original and has been done by myself and under the general supervision of my project guide.
- The work reported herein has not been submitted to any other Institute for any degree or diploma.
- Whenever I have used materials (concepts, ideas, text, expressions, data, graphs, diagrams, theoretical analysis, results, etc.) from other sources, I have given due credit by citing them in the text of the report and giving their details in the references. Elaborate sentences used verbatim from published work have been clearly identified and quoted.
- I also affirm that no part of this thesis can be considered plagiarism to the best of my knowledge and understanding and take complete responsibility if any complaint arises.
- I am fully aware that my project guide is not in a position to check for any possible instance of plagiarism within this submitted work.

# Certificate

This is to certify that this report entitled "**Name of the Project**" submitted by **Name of the student** (UEN of the student), in partial fulfilment of the requirements for the award of the degree of Bachelor of Technology (Hons.) in Computer Science & Engineering (Name of the Specialization), to the Vidyashilp University, Bangalore, Karnataka, India, is a record of the bonafide work carried out by this student under my/our guidance and supervision at the School of Engineering and Technology, Vidyashilp University, Bangalore, Karnataka, India. To the best of my/our knowledge, no part of the work reported in this report has been presented for the award of any degree at any other institution.

Date: November 30, 2026
Place: Bangalore

Name of the supervisor with appropriate honorific
(Designation of the guide)

# Abstract

Write the abstract here. An abstract must be a SINGLE, continuous paragraph. Do not use bullet points or citations here. Use the given template to write your abstract. The word limit if from 150 to 250. Complete your entire report first and then start writing your abstract. This will ensure that you highlight all the important points of your project.

# Contents

**Abstract** **v**

**List of Figures** **vii**

**List of Tables** **viii**

**List of Symbols and Abbreviations** **ix**

# List of Figures

1.1 This is just a placeholder image. Write the description of your image here. . . . . 1
1.2 Write descriptions about the images here. (a) This is Subfigure 1. (b) This is Subfigure 2. (c) This is Subfigure 3. (d) This is Subfigure 4. . . . . 2

# List of Tables

4.1 Description of the table. . . . . 6

# List of Symbols and Abbreviations

| Symbols | Description |
|---|---|
| $N$ | Number of Data Points |

# 1

# Introduction

The introduction starts here. Write the introduction of the related concepts and the problems that your project addresses. Focus on diagnosing the problem rather than presenting the solution here. You may use sections and subsections as given below depending upon your needs. You should write about the need, current reality and gap, and consequences if that gap in three separate paragraphs. End your section with a sentence stating how your project bridges this gap.

## 1.1 Problem Statement

To add a figure, use this code. Use [t] to add the image at the top of the page, [b] for bottom, [h] for here, [p] to put the image on a separate page. The width specification of 0.5\textwidth is to ensure the image occupies only 50% of the page width. You may change it depending on the size that you want. To refer to the image in text, use the label of the image like this Fig. 1.1. The label is a short name that you can use for that image. Use a different label for each image. To refer to a research paper use this [1]

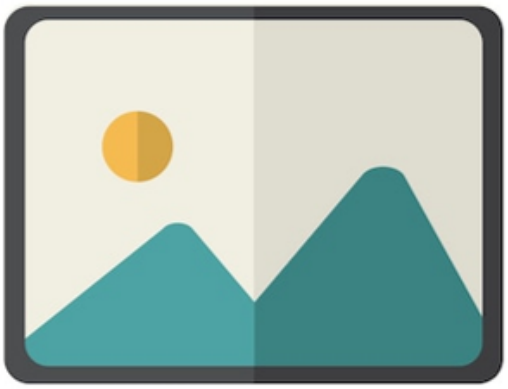

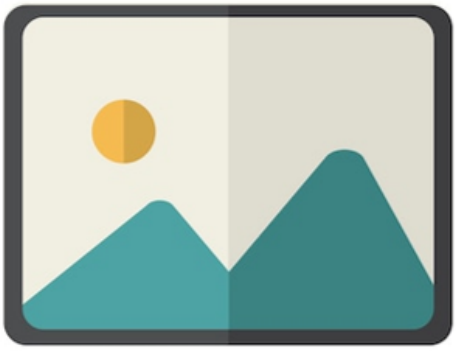

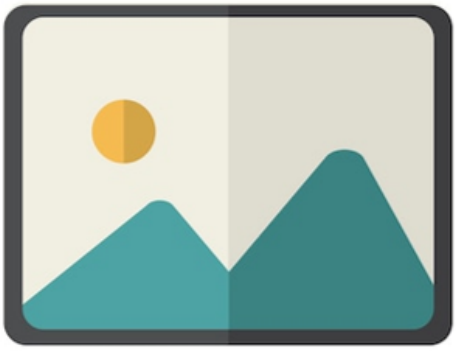

Figure 1.1: This is just a placeholder image. Write the description of your image here.

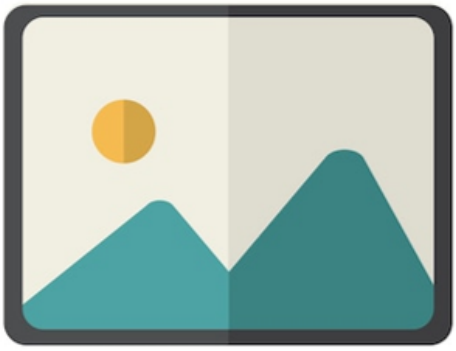

You may add more sections and subsections or even subsubsections as per your need. Refer to a section like this: Section 1.1.

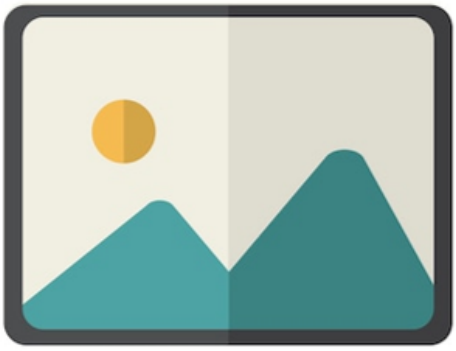

(a) Subfigure 1

(b) Subfigure 2

(c) Subfigure 3

(d) Subfigure 4

Figure 1.2: Write descriptions about the images here. (a) This is Subfigure 1. (b) This is Subfigure 2. (c) This is Subfigure 3. (d) This is Subfigure 4.

## 1.2 Objectives

Write about the objectives of your project in this section. You can have maximum 4 objectives.

We can also add multiple figures in a grid as shown in Fig. 1.2. Refer to each subfigure like this Fig. 1.2a or Fig. 1.2b

To add hyperlinks in your document, please use this syntax: Vidyashilp University

# 2

# Literature Survey

This is the second chapter.

## 2.1 Literature Review Related to Concept 1

## 2.2 Literature Review Related to Concept 2

You may add more sections depending on how many concepts you are using in your project.

## 2.3 Motivation

After you have outlined the gaps in the current state of the research in your area, in this section write about each of these gaps and how your project aims to bridge these gaps.

# 3

# Implementation Details

This chapter contains implementation details such as the methodology, algorithms or flowcharts, Hardware and software specifications, etc. To refer to different sections or chapters use their label like this: Chapter 1, or Section 3.1.

## 3.1 Methodology

This is the third chapter. You may need to use mathematical symbols in the text like $n$, $n_{ij}$, $n^2$, or $n^{ij}$.

You can write the equations as given below using only the $ signs. These equations will not be numbered and hence, cannot be referred to.

$$\mathcal{X} = \{\mathbf{x}_{ijk} | i = 1, \cdots, c; \;\; j = 1, \cdots, v; \;\; k = 1, \cdots, n_{ij}\}$$

For equations that are numbered and that can be referred, use the equation environment as this:

$$\mathcal{X} = \{\mathbf{x}_{ijk} | i = 1, \cdots, c; \;\; j = 1, \cdots, v; \;\; k = 1, \cdots, n_{ij}\} \tag{3.1}$$

You can refer to the equations just as you did for images, chapters, or sections like this: Eq. 3.1.

Multi-line equations:

$$\begin{aligned} \mathbf{S}'_W &= \sum_{i=1, i \neq E}^{c} \mathbf{S}_{W_i} + \mathbf{S}'_{W_E} \\ &= \mathbf{S}_W + \frac{v \; n_E}{(n_E + v)} \left(\bar{\mathbf{m}}_E - \mathbf{m}_E\right) \left(\bar{\mathbf{m}}_E - \mathbf{m}_E\right)^T + \sum_{j=1}^{v} \left(\bar{\mathbf{y}_j} - \mathbf{m}_E\right) \left(\bar{\mathbf{y}_j} - \mathbf{m}_E\right)^T \end{aligned} \tag{3.2}$$

## 3.2 Workflow

In this section, show the image of the technical workflow of your model and explain that workflow in detail. You may start with input or requirements and then show what each stage of the workflow does to the input until it produces the output.

## 3.3 Tools and Technologies Used

### 3.3.1 Hardware Details

### 3.3.2 Software Details

# 4

# Results and Discussions

This is the fourth chapter. You will showcase your results and discuss them to analyze your findings and tell the reader what do your results mean. You may choose to have a different section for each of the parameter of comparison if they are significant enough to have their own section. Otherwise, you may showcase all the results in one section with descriptions and then, in another section, discuss all your results.

## 4.1 Results

To add a table in the document use the following code. [h], [t], [b], [p] means the same as it meant for the images. The values c, l, r mean center, left and right column alignment, respectively. The vertical bar symbol (|) is used to indicate that a vertical line is to be drawn in the table to separate the columns from each other or on the very left and very right of the table. The command \hline is used to draw the horizontal line inside the table and at top and bottom of the table.

Table 4.1: Description of the table.

| **Column Name** | **Column Name** | **Column Name** | **Column Name** |
|---|---|---|---|
| value1 | value2 | value3 | value4 |
| | | | |
| | | | |

## 4.2 Discussions

# 5

# Conclusion and Future Scope

This is the last chapter. Write your conclusion and scope for the future work, if any, here.

## 5.1 Conclusion

## 5.2 Scope for Future Work

# Bibliography

[1] S. S. Shivagunde, Mahendra B. M., LaTex template for IDP report (2026) 1–15.

# Appendix

This chapter is not numbered as the other chapters and is optional. If you have mathematical derivations or proofs or any other supporting material that you wish to submit along with the report, it can be done in this section. Use different sections for different proofs.derivations. Use A, B, C... ordering for each section. Do not remove the * after \chapter or \section. It is used to indicate that these chapters or sections are not numbered.

## A. Derivation of A Certain Formula

Add you proof here. Use another section for another proof.
